LEGEND 2

1.External roof made of 1,5mm thickness corugatted steel sheet,(the height of corrugation is 25mm);the roof is continuosely welded to frame, pre-coated with primer, and than painted , min. 240 micrometter outside and 180 micrometter inside, bicomponent paint;
2.External walls made of 1,5mm thickness corugatted steel sheet,(the height of corrugation is 25mm);the walls are continuosly welded to frame, pre-coated with primer, and than painted , min. 240 micrometter outside and 180 micrometter inside, bicomponent paint;
3.Outside floor made from metallic sheet 2,5mm thickness continuously welded to frame and than painted , min. 240 micrometter, bicomponent paint
4. Internal Thermal insulated roof, 80mm thickness, made from metallic sandwich rock-wool type, REI 60; painted RAL 9002, electrostatic painting
5. Internal Thermal insulated walls, 80mm thickness, made from metallic sandwich rock-wool type, REI 60; painted RAL 9002, electrostatic painting
6. Inside floor made from aluminium demountable tiles 5 mm thickness ;
7. Internal Thermal insulated floor with 80 mm rock-wool;
8.Metal beam for support equipment, welded steel with thickness of 4 mm.
9.Metallic frame for montage equipment, steel thickness 3 mm, painted RAL 9002;
10.Runway extraction for resin cast transformer 2000 KVA , painted;
11.Bride anchor.
12.Coltar ISO lifting and bearing welded, painted , min. 240 µm.

OBS.
Weight empty =7500 KG
Weight isolation =6500 KG
Weight equipment =19700 KG
Weight with equipment =33700 KG
