

**6 September 2016**

Schneider Electric France has successfully completed the commissioning of a SBOX 1250 kVA electric container manufactured by Electrotehno and installed in the Casablanca military port.

The container feeds two military frigates while they are anchored in the port. The container was completed and tested in April 2016, and then shipped to Morocco, installed and retested in the site. See pictures during the tests [here](#).
